PROFILE SUMMARY

Technology executive with 15+ years of experience building and scaling engineering organizations, modernizing enterprise platforms and delivering AI-enabled solutions across data-intensive and increasingly regulated industries. I combine executive leadership with hands-on architectural expertise, partnering with business and technology leaders to translate strategy into scalable platforms, high-performing engineering teams and measurable business outcomes.

EXECUTIVE VALUE PROPOSITION

- Build and scale engineering organizations from early-stage teams to multi-disciplinary functions
- Translate business strategy into technology roadmaps, operating models and delivery plans
- Lead AI, data and platform modernization across enterprise and cloud-native environments
- Establish engineering governance, architecture standards and reliable delivery practices
- Advise founders, executives and clients on technical strategy, risk, scalability and investment priorities
- Bridge product, engineering, security, data and commercial stakeholders
- Support regulated and high-trust systems through security, auditability, authorization and operational controls

SELECTED ACHIEVEMENTS

- Scaled engineering organizations from **2 to 20+ engineers** across distributed teams
- Increased release velocity by **40%** and reduced incidents by **30%**
- Delivered AI-enabled workflows improving productivity by **200%+**
- Built platforms supporting **millions of users** and **900+ retail locations**
- Introduced RAG, AI validation and autonomous workflows into enterprise products

SELECTED LEADERSHIP & ENGINEERING EXPERIENCE

03/2026 – Present
Berlin, Germany

Head of Engineering, Dado Software GmbH

- Lead a globally distributed engineering organization across Europe, Asia and the US, owning engineering strategy, architecture and delivery.
- Partner with leadership to translate business priorities into technology roadmaps and platform investments.
- Directed major modernization initiatives across GCP and React under aggressive timelines.
- Introduced autonomous AI workflows that improved productivity by more than 200% and user confidence by over 70%.

2025 – Present
UK, Remote

Co-Founder, Aim Higher Innovations Ltd

Co-founded a technology venture focused on building AI-enabled infrastructure for trusted decision-making in regulated industries.

- Define the long-term product vision, technology strategy and architecture for a cloud-native RegTech platform.
- Lead platform design spanning policy-driven authorization, AI-assisted decision support, auditability and compliance automation.
- Translate complex regulatory and operational requirements into scalable platform capabilities.
- Establish engineering standards, architecture principles and product delivery strategy from inception.
- Engage with prospective customers, partners and advisors to validate product direction and market needs.

07/2023 – 02/2026
Munich, Germany

Head of Engineering, Data & AI, Emnos GmbH

- Led 20+ software and data engineers across multiple enterprise analytics products.

- Increased release velocity by 40% and reduced incidents by 30% through platform modernization, CI/CD and observability.
- Introduced AI validation and RAG-based insight delivery, reducing analytics turnaround time by 50%.
- Aligned engineering strategy with executive priorities, customer commitments and enterprise data objectives.

10/2025 – 06/2026
Hamburg, Germany

- Fractional CTO**, Precision Labs
- Advise founders and senior stakeholders on product strategy, architecture, delivery models and technical investment.
 - Conduct architecture reviews and define engineering standards across multiple teams and products.
 - Act as the primary client-facing technology leader, translating technical risk and trade-offs into business decisions.
 - Support hiring, team design and the transition from MVPs to production-ready platforms.

06/2021 – 06/2023
Hamburg, Germany

- Senior Software Engineer**, Fielmann AG
- Led development of a greenfield platform centralizing orders and operational data across more than 900 retail locations.
 - Architected unified APIs and data models supporting multiple business channels and downstream teams.
 - Managed delivery KPIs and improved onboarding time by 35% through structured mentoring and documentation.

11/2019 – 05/2021
Hamburg, Germany

- Senior Software Engineer**, InnoGames GmbH
- Led modernization work on platforms serving more than 5 million active users.
 - Reduced downtime by 25% through scalability, resilience and operational improvements.
 - Introduced automated testing and CI/CD practices, reducing release-related issues by 40%.

03/2023 – 02/2024
Hamburg, Germany

- Fractional CTO**, webeet.io
- Led technology strategy and architecture across startup and client engagements.
 - Advised founders on product delivery, scalability, technical risk and team structure.
 - Mentored 200+ engineers and trainees while establishing production-oriented delivery practices.

01/2022 – Present
Berlin, Germany

- Education Mentor**, Masterschool Ltd
- Mentor professionals in data engineering, cybersecurity and full-stack development.
 - Provide architecture guidance, technical coaching and bilingual interview preparation.

06/2014 – 01/2017
London, UK

- Head of Engineering**, Myflo Ltd
- Built and scaled the engineering organization from 2 to 21 people.
 - Established delivery processes and CI/CD, reducing lead times by 50%.
 - Led platform modernization, hiring and engineering capability development.

EXECUTIVE LEADERSHIP & ADVISORY AREAS

- Technology Strategy & Strategic Roadmapping
- Engineering Organization Design & Scaling
- Fractional CTO & Founder Advisory
- AI Transformation & Enterprise Adoption
- Platform Architecture & Modernization
- Regulated Systems, Security & Technical Governance
- Product and Engineering Operating Models
- Delivery Governance, Risk & Reliability
- Executive Stakeholder and Client Communication
- Hiring, Leadership Development & Team Structuring
- Technical Due Diligence & Architecture Reviews
- Data Platforms, Cloud Infrastructure & Automation
- Change Leadership & Organizational Transformation
- Cross-Functional Product, Data and Engineering Leadership

SKILLS

- **Leadership:** Technology strategy, engineering organization design, fractional CTO advisory, hiring, delivery governance, executive communication
- **Domains:** AI, data platforms, RegTech, security, authorization, auditability, enterprise systems
- **Technology:** GCP, AWS, Azure, Kubernetes, Kotlin, Java, Python, Node.js, React, PostgreSQL, BigQuery, Redis, Elasticsearch, RAG and agentic AI
